Allowable Subject Matter

1. **Claims 1 and 5-14 are allowed.**
2. The following is an examiner's statement of reasons for allowance:
3. With respect to claims 1, 13 and 14, the prior art fails to teach a planar antenna structure comprising: a ground plane, a radiating element galvanically isolated from other conductive parts of the radio device, a feed element, electromagnetically coupled to the radiating element, a feed circuit board including feed element and radiating element, wherein feed and ground conductors are meandering strip conductors. The ground conductor electromagnetically coupling the feed conductor to the ground plane, further wherein at least two operating band are provided.
4. With respect to claims 5-12, those claims are allowed by the virtue of their dependency on claim 1.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The Prior Art

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
7. Annabi et al (US Publication No. 2004/0145525) discloses a planar antenna wherein a radiating element is galvanically isolated from the ground plane and other

conductive parts of a radio device, and further wherein feed element is only electromagnetically coupled to the radiating element. This prior art however does not teach the feed conductor and the ground conductor being meandering strip conductors.
